We have about 500 or 600 large Platt River Cedars that will run from 9-16 feet. They are not No. 1 trees, but have been sheared and would be good for large plantings and many of them are large enough for derrick trees. We invite you to visit us and inspect these trees if you are in the market, and will be willing to make a very low price, as they must be moved this spring.
